**Additional Information**

Our congratulations and appreciation to John Gavin, and Septic Tank Producer Member, United Concrete Products, Inc., Yalesville, CT, for their **membership upgrade to Full Producer Member.**

Our congratulations to **Professional Member CHA Consulting** (Clough Harbour & Associates, or CHA) on their merger with RW Armstrong, Indianapolis, to create a 1,250 person global firm.

And a cautionary note from Associate Member Ed Pennypacker, Jepco Sales: the most recent ASTM standard, C-1227-10A, calls for vacuum tests on precast concrete septic tanks to hold 4" of mercury for 5 minutes **with no loss.** The old '09 standard was to reach 4" Hg and hold it for two minutes with an allowed loss of 10%. (Google ASTM C-1227 to down load a copy of the spec. for \$40.)
