PCANY

Buyer's Guide

PRECAST CONCRETE ASSOCIATION OF NEW YORK, INC.

Notes From The Director

The mission of the Precast Concrete Association of New York is to promote and educate construction industry stakeholders on the many benefits of precast concrete products. Our membership includes producers, suppliers of equipment and services, and professionals, who's support of this association is critical to our mission. Accordingly, we have developed this Buyer's Guide as a reference to the many products and services provided by our members.

The PCANY Buyer's Guide includes a product matrix for precast producers and associates as a quick reference to the products and services provided. We are proud to report that all of the full producer member facilities are either NPCA or PCI certified. The wastewater products listed by our Septic Tank Producer members have all been tested and verified by licensed professional engineers to meet the structural and watertightness criteria set forth in the PCANY Certification Program for Water and Wastewater Products.

I hope that you find this publication useful and I encourage your support of the listed companies, all of whom are committed to assuring durable, economical, & quality products for the construction industry. As always, please do not hesitate to contact me with questions, concerns, or suggestions.

Warmest Regards,

Precast Concrete Association of New York, Inc.

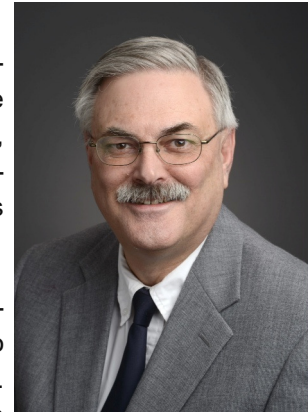

Ronald E. Thornton, P.E.

Executive Director

Ph (607) 203-1165
